DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4, 6-12, 15, 17-25, 27-29, 32-35, 37-39, and 42-44 are allowed.
2. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicant's persuasive arguments filed December 11th, 2006, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. The prior art does not teach all of the limitations of the independent claims in combination with the other elements presented.

Specifically, the prior art teaches a network configuration system using applets that configures network devices automatically and monitors their status (O'Toole, abstract; Engel, abstract).

However, as per independent claims 1 and 12, the prior art fails to teach wherein after configuration packet is sent, a status message is sent responsive to an unsuccessful configuration, and the configuration packet is resent in combination with the other limitations present in claims 1 and 12. As per independent claims 24 and 36, the prior art fails to teach wherein after the configuration packet sent, responding with a

status message, and then initiating a secure management session using a status daemon in combination with the other limitations present in claims 24 and 36.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
